

FlexiLab

// THE COMPLETE FLEXIBLE
LABORATORY FURNITURE SYSTEM

FlexiLab

// WORK STATIONS

// STORAGE UNITS

// SERVICE PODS AND POLES

// TAILOR-MADE

The Concept

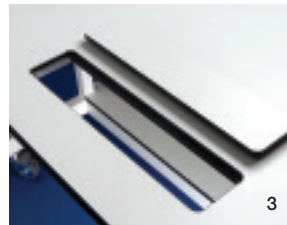

The FlexiLab System provides the complete relocatable furniture solution, which is designed to adapt to the changing requirements of the laboratory environment.

Through a range of modular benching, storage and service supply solutions, we have responded to the needs of our clients for scientific workspaces that can be installed and reconfigured rapidly.

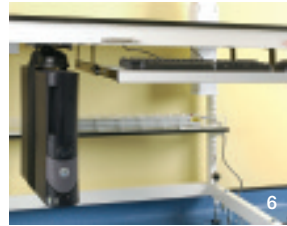

Key Features

- 1 The work station is fully re-locatable with integrated mobile castors and heavy duty site levelling feet. (max. loading per workstation, 350kg)
- 2 Rebated rear worktop cut-outs for power poles located on the right and left hand side for full flexibility. Supplied with flush rebated flush fitting cover.
- 3 Rebated central front cut-out for cable/ tube management. Supplied with rebated flush fitting cover.
- 4 Adjustable rear shelf with cable basket.

Optional Features

- 5 Removable rear reagent/storage rack.
- 6 Optional CPU holder, pull-out keyboard tray and a range of monitor brackets are available.

Work Stations

// THE SYSTEM PROVIDES A FULL RANGE OF MODULAR WORK STATIONS

Sturdy epoxy coated support frames are fitted with braked mobile castors for repositioning, and site levelling feet to ensure stability.

Chemically resistant worktops are offered with pre-machined, rebated cut-outs, which are designed to accept optional service poles or cable access. A rear adjustable tray provides a solution to under-bench cable management.

Modular Sizes

A range of modular sizes are available in 750 (Narrow), 900 (Standard) and 1200mm (Double sided) bench depths. Standard bench widths are 900, 1200, 1500 and 1800mm and bench heights 900 (standing) and 750mm (sitting).

4

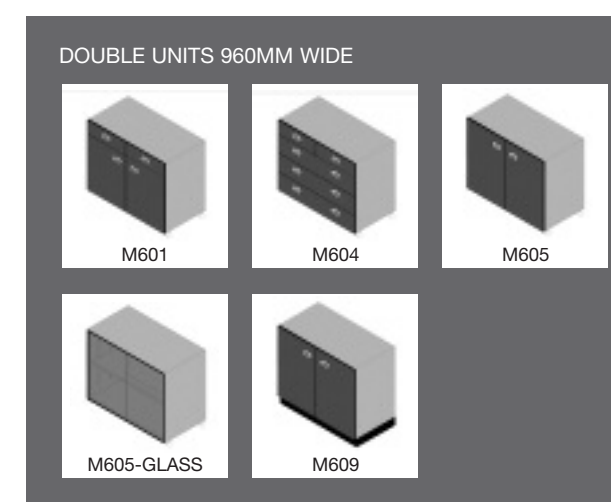

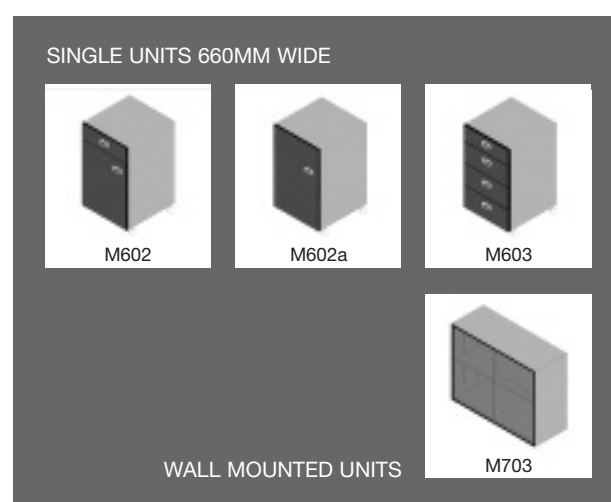

Key Features

- 1 Fully re-locatable with braked castors.
- 2 Easy clean semi-flush or 'D' type handles.
- 3 Glass or solid fronted doors are offered as an option.
- 4 A range of storage accessories are available.

Storage Units

// THE SYSTEM PROVIDES A FULL RANGE OF MOBILE STORAGE UNITS

Constructed to a robust specification, the units are supplied with braked castors to allow easy relocation.

Modular Sizes

Units are supplied in 660 (single) and 960mm (double) widths and allow a full 500mm deep carcass. The sizes have been carefully selected to maximise the storage space beneath the work stations.

Service Pods and Poles

// PROVIDING FLEXIBILITY OF SERVICE SUPPLY

Bench-mounted service poles meet specific electrical and gas requirements. Service poles are pre-wired and tested and fixed into pre-machined cut-outs in the bench surface.

Service pods are ceiling-mounted and relocatable within the ceiling grid. They are also supplied pre-wired and pre-tested.

4

Key Features

- 1 Ceiling mounted service pod, supplied with a selection of gas, electrical and data services to client specification.
- 2 Bench mounted service pole, with single electrical outlets, data outlets and RCD protection.
- 3 Service poles either connect into ceiling infrastructure (as shown) or to below bench electrical tap off boxes.
- 4 Service poles supplied with RCD protection to client specification.

Tailor-Made

// FURNITURE DESIGNED AND MANUFACTURED
TO MEET SPECIFIC CLIENT REQUIREMENTS

As manufacturers, we are able to offer tailor-made work stations and storage solutions.

These are designed to satisfy the most complex user requirements.

A full CAD drafting service ensures our tailor-made items meet the exact needs of our clients.

1 Mobile sink unit supplied
with flexible waste and
water connections.

2 Tailor made tray and drawer unit
(shallow trays)

3 Special requirement
cupboard unit.

4 Glassware transport trolley.

5 CPU holder and keyboard tray
attached to standard bench.

6 Waste solvent storage trolley.

7 Optional rise and fall mechanism
to permit height adjustment.

8 Fixed safety station with
wash hand basin and
emergency eye wash.
