

SMARTLab

// THE FULLY MOBILE, HEIGHT ADJUSTABLE
LABORATORY FURNITURE SYSTEM

SMARTLab

// WORK STATIONS

// STORAGE UNITS

// SERVICE MASTS

// ADDITIONAL FURNITURE

The Concept

The SMARTLab system provides the complete relocatable furniture solution, which is designed to adapt to the changing requirements of the laboratory environment.

Through a range of height adjustable modular benching, storage and service supply solutions, we have responded to the needs of our clients for scientific workspaces that can be installed and reconfigured rapidly.

Key Features

- 1 Height adjustable at three levels.
- 2 Up and Down switches.
- 3 Optional under bench power.
- 4 Optional deeper worktops.
- 5 Optional clip-on power bar.
- 6 Optional monitor brackets.

Work Stations

// THE SYSTEM PROVIDES A FULL RANGE OF MODULAR WORK STATIONS

Sturdy epoxy coated support frames are fitted with braked mobile castors for repositioning, and site levelling feet to ensure stability.

Benches are electronically height adjustable between 700mm and 1100mm, providing a total loading capacity of either 350Kg (standard) or 500Kg (heavy lift).

Chemically resistant worktops are offered with pre-machined, rebated cut-outs, which are designed to accept optional service poles or cable access.

A rear adjustable tray provides a solution to under-bench cable management.

Optional extras include under bench power bars, above bench service masts, clip on power bars and bench mounted monitor brackets.

Key Features

- 1 Fully re-locatable with braked castors.
- 2 M602A - Cupboard unit.
- 3 M603 - 4 drawer unit.
- 4 MSC - Storage unit.
- 5 2 tier removable equipment shelving.

Storage Units

// THE SYSTEM PROVIDES A FULL RANGE OF MOBILE STORAGE UNITS

Constructed to a robust specification, the units are supplied with braked castors to allow easy relocation.

SINGLE UNITS 635 MM WIDE

Modular Sizes

Units are supplied in 635 (single) and 900mm (double) widths and allow a full 600mm deep carcass.

The sizes have been carefully selected to maximise the storage space beneath the work stations.

SMARTLab

Service Masts

// PROVIDING FLEXIBILITY OF SERVICE SUPPLY

Bench-mounted service masts meet specific electrical and gas requirements. Service masts are pre-wired and tested and fixed into pre-machined cut-outs in the bench surface.

They are supplied with pre-wired RCD protected electrical sockets with an open access rear chamber to accept 1-3 gas services.

Key Features

- 1 Flexible service connections into ceiling infrastructure
- 2 Service mast fitted to bench - can be located on right or left hand side as required
- 3 Open access rear chamber for service provision flexibility
- 4 Optional gas taps

Additional Furniture

// FURNITURE DESIGNED AND MANUFACTURED TO MEET SPECIFIC CLIENT REQUIREMENTS

As manufacturers, we are able to offer tailor-made work stations and storage solutions. These are designed to satisfy the most complex user requirements.

A full CAD drafting service ensures our tailor-made items meet the exact needs of our clients.

Key Features

- 1 Fixed kanban consumable storage units
- 2 Fixed sinks in 316 grade stainless steel or epoxy
- 3 Fixed consumable store
- 4 Mobile consumable storage unit
